All of it was very helpful and usefull

100

Please add any comments or suggestions you have about your learning experience in this lab.

They were very helpful and explained a lot of things about homework and concepts that I didn't know.

No suggestions, I felt lab was just what I needed to understand the material better and learn better how to do the homework.

Kristin is very helpful and a great teacher.

It was very helpful when my TA got me started on problems but then allowed me to finish the problem on my own.

She did an excellent job answering questions and explaining topics.

I think Kristen was a fantastic TA. She explained difficult concepts clearly and gave sufficient help with difficult homework problems. She was very helpful with individual questions in her office hours.

I feel that the labs are most helpful for people who haven't finished their homework before the lab, and it wasn't very helpful for those who had already completed the assignments.

.

I wish she were more knowledgeable.

It was a great experience. I think it could have been good if we had more group activities.

I thought that the labs were well organised and taught the material very well.

It was a good rehab after having my mind obliterated by learning new calculus concepts first thing in the morning....I feel like I was able to get a lot more out of the lab than lecture because of it being later in the day.

I like that lab attendance wasn't required. I personally didn't go very often because I understand the material well, but when I did go, it was a great resource for me and Kristen was extremely helpful.

Kristin was great. She explained the concepts well, helped us review for tests, and was very

friendly. I made good use of her office hours and emailed her with questions almost every homework assignment. She was more than willing to help.

The lab was good to get answers to homework problems, and was helpful in understanding what we learned in lecture.

Kristin was very helpful in clearing up concepts and simplifying things so that they were easier to understand.
