Please add any comments or suggestions you have about your learning experience in this lab.

It is great to get lots of practice in this setting after reviewing the material in lecture.

The Lab was useful. Sometimes, it wasn't as useful, because I already felt I had mastered the concepts and didn't have any questions about the homework, but often reviewing concepts, or approaching them in a different way helped me to deepen my knowledge and understanding. My TA was also very nice, very considerate, and very knowledgeable.

It's great!

I really liked how we worked through problems that the students suggested, or review some of the material from the last lecture given. It was very helpful.

I thought she did a very good job, was always open to our questions and taught the principles very well. The only hard part was her lab hours and reviews were always during the day because that's when the majority of the students needed, but there were a few of us that could never go to office hours or reviews because we worked until after 5

I thought the lab was very helpful and Kristin was a great TA.

My lab experience was great. Kristen was very good at answering any questions that we had and I could tell that she really wanted us to succeed.

Ulmer was awesome

The lab was super helpful!!! It gave me time to get my questions answered and was given the opportunity to answer more practice problems! The time it took to have my homework graded was spot on! Everything done in lab was very useful!

I thought it was helpful, but some of the activities we did did not help me understand things better.

Kristen is a good TA
